DEVELOPMENTAL SCREENING

COME SEE OUR SENIOR PHYSIO!

Common developmental concerns we see:

- Reduced tolerance for tummy time
- Delayed rolling, sitting, crawling, or walking
- Adoption of different movement patterns such as bottom shuffling, 'W' sitting or toe walking
- Head turning preferences that don't resolve within the early weeks
- Head shape changes (plagiocephaly, brachycephaly, and scaphocephaly)
- Tight neck muscle (Torticollis)
- Positional foot concerns
- Low muscle tone
- Hyper mobility

Every Tuesday
10:30am–11:30am
